

I listen to K-LOVE Radio because it doesn't have to be censored when my family and I listen to it. It helps instill the family values that I believe should be and are important in the United States of America. It is solely supported by its listeners and this new LPFM could wipe this out. This is wrong. When does the importance of a healthy radio station start to matter to our country. Please do not make this change. It affects millions of people who need to have some hope in their lives. This would have a negative affect on my stations 105.5, 89.1 and 100.9

Please reconsider this action. Thank you.

A concerned American.
